[GitHub](#)

### **CAREER OBJECTIVE**

I want to work in a position where I can learn a lot to become a successful full-stack web developer.

### **SKILLS AND TECHNOLOGIES**

- **Expertise:** HTML | CSS | Bootstrap | Tailwind | JavaScript | React.js
- **Comfortable:** Firebase | Express | Node.js | MongoDB
- **Familiar:** JWT
- **Tools:** VS-Code | GitHub | Google chrome dev tool.

### **PROJECTS**

**Reader's hub** (See [Live](#) | [GitHub Client](#) | [GitHub Server](#) )

- This is a used book resale website, where buyers, sellers, and admin roles are different and their routes are different too.
- A seller can add products and delete his/her added product, admin can delete users.
- **Used technology:** Tailwind | React.js | Firebase | Express | Node.js | MongoDB

**M'sPhotography** (See [Live](#) | [GitHub Client](#) | [GitHub Server](#) )

- This is a photographer's website where a client can add and see others' reviews and can delete his/her reviews.
- Without login a user can't drop any reviews.
- **Used technology:** Tailwind | React.js | Firebase | Express | MongoDB

**Tech Hero** (See [Live](#) | [GitHub Client](#) | [GitHub Server](#) )

- This is a programming language tutorial website. Without registration, nobody can purchase any course.
- I tried to implement a dark and light theme.
- **Used technology:** React-Bootstrap | React.js | Firebase | Express | react to pdf

### **EDUCATION**

**Degree:** BBS in Accounting,

**Institute:** Tejgaon College, Dhaka.

### **LANGUAGE**

- Bangla: Native
- English: Comfortable
